WENDEROTH, LIND & PONACK, L.L.P. 2033 K STREET N. W. SUITE 800 WASHINGTON, DC 20006-1021			PATEL, ASHOK	
		ART UNIT		PAPER NUMBER
				2879
DATE MAILED: 08/23/2005				

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.	Applicant(s)
	10/501,137	FUJITANI, MORIO
	Examiner	Art Unit
	Ashok Patel	2879

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on _____.
- 2a) This action is **FINAL**. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on 13 July 2004 is/are: a) accepted or b) objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 2879

1. Figures 5-7 should be designated by a legend such as -- Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore,

(1) a periphery of an upper dielectric layer of the first dielectric layer positioned **identically** in size and shape to a periphery of a lower dielectric layer thereof; and (2) a periphery of an upper dielectric layer of the second dielectric layer positioned **identically** in size and shape to a periphery of a lower dielectric layer thereof, as recited in claim 1 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

The Examiner however acknowledged that: (1) a periphery of an upper dielectric layer of the first dielectric layer positioned **partially** in size and shape to a periphery of a lower dielectric layer thereof; and (2) a periphery of an upper dielectric layer of the second dielectric layer positioned **partially** in size and shape to a periphery of a lower dielectric layer thereof, as recited in claim 1 are shown in the drawings.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the

Art Unit: 2879

applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Nishiki et al (USPN 6,261,144).

Nishiki et al disclose applicant's claimed plasma display panel (at least Figure 7) including: a multilayered first dielectric layer (17-18) for covering a display electrode formed of scanning and sustain electrodes (15, 16) and provided on a front substrate (14) and, a second multilayered dielectric layer (12-13) for covering a data electrode (11) provided on a back substrate (10), wherein

a periphery of an upper dielectric layer (18) of the first dielectric layer is positioned identically or partially in size and shape to a periphery of a lower dielectric layer (17) of the first dielectric layer (17) and/or

Art Unit: 2879

a periphery of an upper dielectric layer (13) of the second dielectric layer is positioned identically or partially in size and shape to a periphery of a lower dielectric layer (12) of the second dielectric layer (17).

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

6. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hiroyuki et al (JP 09-259768, of record).

Hiroyuki et al disclose applicant's claimed plasma display panel (Figures 1-3) including: a multilayered first dielectric layer (17) for covering a display electrode, which is provided on a front substrate (11) and formed of scanning and sustain electrodes (X, Y), a second dielectric layer (24) for covering a data electrode (A) provided on a back substrate (21), wherein a periphery of an upper dielectric layer (172) of the first dielectric layer (17) is positioned identically or partially in

Art Unit: 2879

size and shape to a periphery of a lower dielectric layer (171) of the dielectric layer (17).

Hiroyuki et al differ from applicant's claimed plasma display panel in that the second dielectric layer (24) is not a multilayered electrode.

Although the Examiner noted that the improvement in applicant's claimed plasma display panel is in the first multilayered dielectric layer (provided on the front substrate), the multilayered second dielectric layers is not shown critical to the inventive feature and does not solve any particular problem that is not solved by prior art plasma display panel. In light of this, applicant's claimed providing multilayered second dielectric layer would have been a matter of obvious design choice to one of ordinary skill in the art at the time of invention.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Awaji et al is cited for showing general structure of a plasma display panel.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ashok Patel whose telephone number is 571-272-2456. The examiner can normally be reached on Monday-Thursday.

Art Unit: 2879

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nimesh Patel can be reached on 571-272-2457. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
